Terminal B-web 93 40
Modern time and attendance

The B-web 93 40 – ideally suited for all your requirements for a time and attendance terminal. Its special feature: 'Guide by Light'. With this intuitive concept, you operate the terminal simply, conveniently and securely. The full-screen glass front has an individually illuminated capacitive keypad. It consists of five function keys (In/Out/Official Absence/Inquiry/Special Function), five special keys (for list selection or language selection) and a numeric keypad for date code or other code input. An interplay of bright and dimmed keys guides you reliably through all applications.

The time bookings of your employees are done via RFID readers – preferably LEGIC, MIFARE or HID. The memory is designed for 2,000 employees and can be adapted individually depending on the planned number of master and booking records.

The application package B-web 93 40 includes all the functions that you currently need for your time and attendance. In addition, you can use the B-web 93 40 for access control: The terminal monitors doors and communicates with access readers.

The CardLink function integrates offline door components into a security solution. These functions can be extended very easily with additional usage licenses. Intelligent service features such as 1-Click Installation or 1-Click replacement in combination with the communication software B-COMM guarantee a high system availability.

Your benefits at a glance

- meets all the requirements of modern time and attendance
- simple and intuitive operation through 'Guide by Light'
- full-screen glass front with wear-resistant keypad
- support of all conventional RFID standards
- integration of biometric identification and verification solutions
- access control functionality through the connection and control of access readers
- standard power supply via Power over Ethernet (PoE)
- Reliable and fast 1-Click installation
- innovative 1-Click analysis and 1-Click replacement in combination with B-COMM
